ANDERSON, D. O. (*See* MURRAY and ANDERSON), 102 (Abst.)
ARBESMAN, C. E., DOLOVICH, J., DUSHENSKI, L. A., WICHER, K., REISMAN, R. E., and TOMASI, T. B., 97 (Abst.)
—. (*See* DOLOVICH, J., et al.), 103 (Abst.)
—. (*See* KOBAYASHI, S., et al.), 152
—. (*See* MCGERITY, J. L., et al.), 96 (Abst.)
—. (*See* REISMAN, R. E. et al.), 37, 115 (Abst.)
—. (*See* WICHER, K., et al.), 63, 74
ARGABRITE, J. W. (*See* BERNSTEIN, L., et al.), 89 (Abst.)
ARKINS, J. A., SCHLUETER, D. P., and FINK, J. N., 93 (Abst.), 209
—. (*See* BUKOSKY, R. J., et al.), 104 (Abst.)
AZOURY, F. J., and GUM, O. B., *38* (Abst.)

B

BACK, N. (*See* DOLOVICH, J., et al.), 103 (Abst.)
BAER, R. L. (*See* FELLNER, M. J., et al.), 111 (Abst.), *35* (Abst.)
BAJOR, G. F. (*See* KALES, A., et al.), 164
BAKER, J. H., *18* (Abst.)
BAKER, L. (*See* LECKS, H. I., et al.), 106 (Abst.)
BALKUV, S. (*See* MUFTUOGLU and BALKUV), *21* (Abst.)
BALL, E. H. (*See* FELLNER, M. J., et al.), 111 (Abst.)
BALL, M. R. (*See* GLASER, J., et al.), *12* (Abst.)
BARBORIAK, J. J. (*See* FINK, J. N., et al.), 297
BARNARD, J. H. (*See* VAN METRE, T. E., et al.), 195
BAUSCHARD, F. A. (*See* EBKEN, R. K., et al.), 338
BEALL, G. N. (*See* KALES, A., et al.), 164
BENDIXEN, G. (*See* SOBORG and BENDIXEN), *31* (Abst.)
BENNER, M. H., ENTA, T., LOCKEY, S., JR., MAKINO, S., and REED, C. E., 110 (Abst.)
BERARD, C. W. (*See* BROWN, R. S., et al.), *45* (Abst.)
BERNSTEIN, I. L. (*See* VAN METRE, T. E., et al.), 195
BERNSTEIN, L., ARGABRITE, J. W., ETTER, R. L., EVANS, R. R., FALLIERS, C. J., FREEDMAN, S. O., GREEN, M. A., LEE, M. L., SACK, S. S., SEGAL, M. S., SWEDLUND, H. A., THOMPSON, H. C., TORSNEY, P. J., and TRIPLETT, W. B., 89 (Abst.)
BERNTON, H. S. (*See* BROWN and BERNTON), 92 (Abst.)
BIERMAN, C. W., and VANARSDEL, P. P., JR., 119 (Abst.)
—. (*See* PIERSON, W. E., et al.), 93 (Abst.)
BLACKBURN, W. R. (*See* FULGIRITI, V. A., et al.), *14* (Abst.)
BLANKENSHIP, W. J. (*See* ALFORD, C. A., et al.), *37* (Abst.)
BLEIBERG, J., 236 (Correspondence)
BONANNO, D. E. (*See* SCOTT and BONANNO), *47* (Abst.)
BRADY, K. (*See* CHAI, H., et al.), 23
BRECKENRIDGE, A., DOLLENG, C., WORLLEDGE, S., HALBOROW, E., and JOHNSON, G., *40* (Abst.)
BRKICH, J. (*See* TAYLOR, W. F., et al.), 92 (Abst.)
BRODY, J. I., and OSKI, F., *30* (Abst.)
BROWN, E. B., 60 (Correspondence)
—, and IPSEN, J., 254
—. (*See* GEORGAKIS, N. G., et al.), *10* (Abst.)
BROWN, H., and BERNTON, H. S., 92 (Abst.)
BROWN, R. S., HAYNES, H. A., FOLEY, H. T., GODWIN, H. A., BERARD, C. W., and CARBONE, P. P., *45* (Abst.)

*January, pp. 1-62; February, pp. 63-122; March, pp. 123-180; April, pp. 181-240; May, pp. 241-304; June, pp. 305-370.

Abstracts: January, pp. *1-8;* February, pp. *9-16;* March, pp. *17-24;* April, pp. *25-32;* May, pp. *33-40;* June, pp. *41-48.*

Subject index*

A

Acetylcysteine, N-, nebulization, combined with bronchodilator in patients with chronic bronchitis; controlled study, 94 (Abst.)

ACTH and synthetic corticotropin, adrenal responses of asthmatic children after, 121 (Abst.)

Adjuvant, alginate, use as vehicle in treatment of ragweed pollinosis, *10* (Abst.)

effect of beta-adrenergic blockade and immunosuppressive effect of epinephrine, 110 (Abst.)

Adrenal, pituitary-, function, recovery of in corticosteroid-treated children, 121 (Abst.)

responses of asthmatic children after synthetic corticotropin and ACTH, 121 (Abst.)

suppression and intranasally applied steroids, 7 (Abst.)

Adrenergic, beta-, blockade, adjuvant effect, and immunosuppressive effect of epinephrine, 110 (Abst.)

animals sensitized to histamine by, corticosteroid enhancement of protective effect of epinephrine and theophylline in, 107 (Abst.)

effect on bronchial sensitivity to methacholine in normal and allergic rhinitis subjects, 108 (Abst.)

pharmacological, and pertussis sensitization, effect on in vitro uptake of D-glucose-2-C^{14} into glycogen of diaphragm and upon formation of $C^{14}O_2$ from glucose-1-C^{14} by adipose tissue, 107 (Abst.)

blocking drugs, epinephrine, and norepinephrine, effect on anaphylactic histamine release in human leukocytes, 109 (Abst.)

blockade, effect on guinea pig tracheal chain, 109 (Abst.)

Aerosol(s), dexamethasone nasal, vs. placebo in treatment of nasal polyposis, double-blind labeled study (Drug Committee of the Research Council of the American Academy of Allergy), 10

Aerosol(s)—Cont'd

isoprenaline, effect on blood-gas tensions in severe bronchial asthma, *45* (Abst.)

isoproterenol and isoproterenol-phenylephrine, effects on hypertensive asthmatic patients (Unger et al.), 285

medication, reactions to in infants and children, *20* (Abst.)

Albumin, bovine serum, immune responses of human adults after oral and parenteral exposure to, 104 (Abst.)

Alginate adjuvant, use as vehicle in treatment of ragweed pollinosis, *10* (Abst.)

Allergen, pollen, pyridine-extracted, alum-precipitated, rise in blocking antibodies in patients with, 115 (Abst.)

Allpyral (alum-precipitated pyridine ragweed extracts), serologic responses to; persistence of hemagglutinins following injection at varying intervals, 116 (Abst.)

vs. whole ragweed extract; antibody response following immunotherapy in ragweed hay fever (Lichtenstein et al.), 49, 115 (Abst.)

Anaphylactic and fluorescent antibody, homologous passive cutaneous, reactions in rabbits infected with *Dirofilaria uniformis*, *22* (Abst.)

histamine release in human leukocytes, effect of epinephrine, norepinephrine, and beta-adrenergic blocking drugs on, 109 (Abst.)

reaction to gamma globulin in individual with acquired hypogammaglobulinemia, 118 (Abst.)

Anaphylaxis, acute, in guinea pigs in vivo, humoral factors affecting pulmonary inflation during, 7 (Abst.)

effect of nitrogen mustard on in pertussis-vaccinated mouse, 106 (Abst.)

in *Peromyscus leucopus* mice (Malkiel and Hargis), 246

slow-reacting substance, in asthma (Funderburk and Ward), 344 (Correspondence)

*January, pp. 1-62; February, pp. 63-122; March, pp. 123-180; April, pp. 181-240; May, pp. 241-304; June, pp. 305-370.

Abstracts: January, pp. *1-8*; February, pp. *9-16*; March, pp. *17-24*; April, pp. *25-32*; May, pp. *33-40*; June, pp. *41-48*.

Anemia, aplastic, immune deficiencies, and abnormalities of lymphoid tissue in thymoma, *29* (Abst.)
pernicious; incidence and significance of circulating antibodies to intrinsic factor and to parietal cells, *48* (Abst.)
Angiitis, necrotizing, hypersensitivity to tobacco smoke as cause, *43* (Abst.)
Angioneurotic edema, iodide myxedema with facial swelling simulating, 120 (Abst.)
Announcements, 62, 180, 240, 302, 348
Antibody(ies), alpha-methyldopa red-cell, nature, *29* (Abst.)
antinuclear, following hydralazine toxicity, *4* (Abst.)
autoimmune, in mongol families, *30* (Abst.)
blocking, rise in patients with pyridine-extracted, alum-precipitated pollen allergen, 115 (Abst.)
circulating, to intrinsic factor and to parietal cells, incidence and significance in pernicious anemia, *48* (Abst.)
classes, correlation of blood eosinophilia with; studies with penicillin hypersensitivity system, 119 (Abst.)
anti-γE, reversed allergic reactions in humans and monkeys with, 96 (Abst.)
gastric, placental transfer of, *6* (Abst.)
penicilloyl, quantitation by radioimmunoprecipitation, 105 (Abst.)
response following immunotherapy in ragweed hay fever: Allpyral vs. whole ragweed extract (Lichtenstein et al.), 49, 115 (Abst.)
skin-sensitizing, and antigen (ragweed) on freezing, lability of dilutions, 98 (Abst.)
to gliadin in serum of wheat-sensitive subject, purification with use of copolymerized gliadin as immunosorbent, 98 (Abst.)
Antibody-synthesizing and delayed-hypersensitivity capacities, dissociation in man, *14* (Abst.)
Antigen(s) E, three-year clinical and immunological study, 115 (Abst.)
in immune reactions, fate, 100 (Abst.)
ingested, systemic allergic reactions to, 91 (Abst.)
nonprecipitating, from timothy pollen extracts, biologic properties, *15* (Abst.)
(ragweed) and skin-sensitizing antibody, lability of dilutions, 98 (Abst.)
Antigenic release, in vitro, of histamine from leukocytes of allergic children, general features, 91 (Abst.)
Antihistamine intoxication, unusual case, *18* (Abst.)
Antimicrobials, increasing use of; review of asthmatic patients hospitalized in pavilion service of The New York Hospital from 1948 to 1963, with emphasis on mortality rate (Dworetzky and Philson), 181
Antinuclear factor(s) and heterologous antisera, competitive binding to human leukocytes, 105 (Abst.)
and positive direct Coombs tests in patients treated with methyldopa, *40* (Abst.)
in nephrotic syndrome secondary to systemic erythematosus and in leprosy, *38* (Abst.)
Antisera, heterologous, and antinuclear factors, competitive binding to human leukocytes, 105 (Abst.)
Arsenicals, inorganic, soluble (Bleiberg) (Harter and Novitch), 236 (Correspondence)
Arterial blood gas values in patients with respiratory failure, effect of oxygen administration by Venturi apparatus on, *28* (Abst.)
carbon dioxide tension in bronchial asthma, 88 (Abst.)
Ascaris hypersensitivity in rhesus monkey; model for study of immediate type hypersensitivity in primate (Weiszer et al.), 14
Asthma, allergic bronchial, double-blind trial of disodium cromoglycate in treatment, *18* (Abst.)
and allergic rhinitis, changes in severity of symptoms due to air pollutants (Brown and Ipsen), 254
and pregnancy, *2* (Abst.)
bronchial, and chronic bronchitis, spirometry and blood-gas tensions in, *11* (Abst.)
arterial carbon dioxide tension in, 88 (Abst.)
disodium cromoglycate in, 89 (Abst.)
symptomatic, effect of corticosteroids on methacholine inhalation in (Arkins et al.), 209
bronchitis, and emphysema, chronic, comparison of midplane, full-chest tomograms, diffusion capacities, sputum eosinophil content, and other parameters in, 94 (Abst.)
Candida albicans precipitins in (Pepys et al.), 305
caused by platinum salts, 117 (Abst.)
chronic, controlled study of effects on manifestations by rigid elimination diet based on Rowe's Cereal-Free Diet 1, 2, 3 (Van Metre et al.), 195
corticosteroid therapy in (Fontana and Ferrara, Fost) (Brown), 58 (Correspondence)
current status of glomectomy, 89 (Abst.)
elevated IgA, and short stature, identical twins with, *26* (Abst.)
new compound for prevention of exacerbations; disodium cromoglycate, 90 (Abst.)
New Orleans epidemic; relationship between outbreaks and influx of ragweed pollen, 90 (Abst.)
raised levels of new immunoglobulin class (IgND) in, *34* (Abst.)

Asthma—Cont'd
regional (Kanto plain), *18* (Abst.)
respiratory arrest in, *3* (Abst.)
severe bronchial, effect of aerosol isoprenaline on blood-gas tensions in, *45* (Abst.)
children, with, bacterial flora of upper respiratory tract in (Sanders and Norman), 319
slow-reacting substance of anaphylaxis in (Funderburk and Ward), 344 (Correspondence)
Asthmatic adults, sleep studies in: relationship of attacks to sleep stage and time of night (Kales et al.), 164
children, adrenal responses after synthetic corticotropin and ACTH, 121 (Abst.)
controlled swimming in; evaluation of physiological and subjective data, 93 (Abst.)
effect of swim training on, 92 (Abst.)
in Japan, mold fungi in etiology, *10* (Abst.)
metabolic response to epinephrine infusion, 106 (Abst.)
therapeutic and investigational evaluation (Chai et al.), 23
hypertensive patients, effects of isoproterenol and isoproterenol-phenylephrine aerosols on (Unger et al.), 285
patients hospitalized in pavilion service of The New York Hospital from 1948 to 1963, review with emphasis on mortality rate (Dworetzky and Philson), 181
Asthmaticus, severe status: prolonged treatment with assisted ventilation (Reisman et al.), 37
status, childhood, respiratory failure in; experience with 30 episodes and evolution of technique, 95 (Abst.)
further studies of adverse effect of excessive nebulized isoproterenol in, 118 (Abst.)
Atopic disease and infection, exfoliative cytology of nasal secretions in, 102 (Abst.)
clinical aspects of eosinophilia in, *36* (Abst.)
patients with, normal individuals, and subjects with family history of atopy, immunologic response to keyhole limpet hematocyanin (KLH) in, 101 (Abst.)
man, failure to elicit histamine eosinophilotaxis in skin; improved technique (Felarca and Lowell), 82
manifestations and delayed hypersensitivity, suppression by measles vaccine, 111 (Abst.)
patients, comparative study of in vitro sensitization of human lung, monkey lung, and monkey ileum by sera from, 96 (Abst.)
Atropine, role as mediator blocker of induced bronchial obstruction, 88 (Abst.)
Autoaggressive disease, lymphopenic, treatment with chemically defined diet, 117 (Abst.)
Autoantibodies in ulcerative colitis, *6* (Abst.)
Autogenous vaccine, treatment of chronic staphylococcic infection in allergic rhinitis with, *16* (Abst.)
Autoimmune antibodies in mongol families, *30* (Abst.)

B

Bacterial flora of upper respiratory tract in children with severe asthma (Sanders and Norman), 319
Barbiturates, contribution to death; review of asthmatic patients hospitalized in pavilion service of The New York Hospital from 1948 to 1963, with emphasis on mortality rate (Dworetzky and Philson), 181
Blastogenic responses in vitro of lymphocytes of ragweed-sensitive individuals (Richter and Naspitz), 140
Blood-gas tensions and spirometry in bronchial asthma and chronic bronchitis, *11* (Abst.)
in severe bronchial asthma, effect of aerosol isoprenaline on, *45* (Abst.)
Bovine serum albumin, immune responses of human adults after oral and parenteral exposure to (Korenblat et al.), 226, 104 (Abst.)
Bradykinin-like activity, presence in nasal secretions from allergic subjects, 103 (Abst.)
Brain lesion, persistent, migrainous attacks with: report of case, *8* (Abst.)
Bronchial asthma, arterial carbon dioxide tension in, 88 (Abst.)
disodium cromoglycate in, 89 (Abst.)
effect of corticosteroids on methacholine inhalation in, 93 (Abst.)
obstruction, induced, role of atropine as mediator blocker, 88 (Abst.)
sensitivity to methacholine in normal and allergic rhinitis subjects, effect of beta-adrenergic blockade on, 108 (Abst.)
Bronchitis, chronic, and bronchial asthma, spirometry and blood-gas tensions in, *11* (Abst.)
nebulization of N-acetylcysteine combined with bronchodilator in patients with; controlled study, 94 (Abst.)
emphysema, and asthma, chronic, comparison of midplane, full-chest tomograms, diffusion capacities, sputum eosinophil content, and other parameters in, 94 (Abst.)
Bronchoconstriction, mechanism in cigarette smoking, *21* (Abst.)
Bronchodilator in patients with chronic bronchitis, nebulization of N-acetylcysteine combined with; controlled study, 94 (Abst.)
Bronchospasm in children, exercise-induced, factors influencing, 93 (Abst.)

C

Cadmium-mercury sensitivity in tattoos, *19* (Abst.)
Candida albicans precipitins in respiratory disease in man (Pepys et al.), 305
Carbon dioxide tension, arterial, in bronchial asthma, 88 (Abst.)
Central nervous system reactions in allergic individuals taking a theophylline-noscapine preparation, *37* (Abst.)
Cephalothin, positive direct Coombs tests due to, *44* (Abst.)
Challenge, quantitative intranasal pollen; effect of daily pollen challenge, environmental pollen exposure, and placebo challenge on nasal membrane (Connell), 123
Chlorogenic acid, allergenic immunodominant locus: quinic acid, 99 (Abst.)
Cigarette smoking, mechanism of bronchoconstriction in, *21* (Abst.)
Clinical allergy, current crisis in; Presidential address (Vaughan), 241
Coffee, effect on function of sympatho-adrenomedullary system in man, *12* (Abst.)
Colitis, ulcerative, autoantibodies in, *6* (Abst.)
Collagenosis, disseminated eosinophilic, and familial eosinophilia, *5* (Abst.)
Complement in normal and disease processes, *13* (Abst.)
Concanavallin A, phytohemagglutinin, in vivo effects, 113 (Abst.)
Contact allergens, common, group variation in reactivity to, *3* (Abst.)
Contraceptives, oral, retinal edema secondary to, *23* (Abst.)
Coombs tests, positive direct, and antinuclear factor in patients treated with methyldopa, *40* (Abst.)
due to cephalothin, *44* (Abst.)
Correspondence, 58, 174, 236, 344
Corticosteroid(s), effect on methacholine inhalation in symptomatic bronchial asthma (Arkins et al.), 209, 93 (Abst.)
enhancement of protective effect of epinephrine and theophylline in animals sensitized to histamine by beta-adrenergic blockade, 107 (Abst.)
reservoir, *3* (Abst.)
response of rabbits to; influence on growth, intraocular pressure, and lens transparency, *5* (Abst.)
therapy in asthma (Fontana and Ferrara, Fost) (Brown), 58 (Correspondence)
Corticosteroid-treated children, recovery of pituitary-adrenal function in, 121 (Abst.)
Corticotropin, synthetic, and ACTH, adrenal responses of asthmatic children after, 121 (Abst.)
Cortisol in time-course of eosinotaxis with use of improved technique, local effects, 118 (Abst.)
Cross-reactive allergy to spurges (Euphorbiaceae), immunology, 99 (Abst.)
Cryptococcosis; cryptococcal antibodies in pigeon breeders' disease (Fink et al.), 297

D

D, anti-, serum given to mother, prevention of hemolytic disease of newborn by, *48* (Abst.)
Dander (horse) and pollen (grass) reaginic activity, association with serum IgE, 95 (Abst.)
DEAE fractions containing reagin, radioactive tracing of IgE in, 96 (Abst.)
Dermatitis, atopic, itch duration in involved skin, *43* (Abst.)
cable mite, investigation, *11* (Abst.)
epoxy resin, prevalence, *42* (Abst.)
occupational, from Naled, *42* (Abst.)
paraben contact, *35* (Abst.)
solar, from plants (phytophotodermatitis); gas plant and wild parsnip, *19* (Abst.)
Dermographism, definition, demonstration, and prevalence (Ebken et al.), 338
Desensitization, cutaneous hypersensitivity and, to mechlorethamine in patients with mycosis fungoides lymphoma, *26* (Abst.)
Dexamethasone nasal aerosol vs. placebo in treatment of nasal polyposis, double-blind labeled study (Drug Committee of the Research Council of the American Academy of Allergy), 10
Diet, elimination, rigid, based on Rowe's Cereal-Free Diet 1, 2, 3, controlled study of effects on manifestations of chronic asthma (Van Metre et al.), 195
Diffusion capacities, midplane, full-chest tomograms, sputum eosinophil content and other parameters in chronic asthma, bronchitis, and emphysema, 94 (Abst.)
Dirofilaria uniformis, homologous passive cutaneous anaphylactic and fluorescent antibody reactions in rabbits infected with, *22* (Abst.)
Disodium, cromoglycate in bronchial asthma, double-blind study, 89 (Abst.)
treatment of allergic bronchial asthma, double-blind trial, *18* (Abst.)
new compound for prevention of exacerbations of asthma, 90 (Abst.)
DNA, anti-, serum factors in chronic microbial diseases and endogenous uveitis, *22* (Abst.)
Drugs, antibacterial, hypersensitivity reactions to in infectious mononucleosis, *43* (Abst.)
Drug-induced systemic lupus erythematosus, epidemiology, *23* (Abst.)
ulcer of lip, *27* (Abst.)

Duodenal ulcer and metal sensitivity, *32* (Abst.)

E

Emphysema, bronchitis, and asthma, chronic, comparison of midplane, full-chest tomograms, diffusion capacities, sputum eosinophil contents, and other parameters in, 94 (Abst.)
Endocarditis, bacterial, treatment of patients with penicillin hypersensitivity, *4* (Abst.)
Eosinophilia, blood correlation with antibody classes; studies with penicillin hypersensitivity system, 119 (Abst.)
clinical aspects in atopic disease, *36* (Abst.)
Eosinophilic collagenosis, disseminated, and familial eosinophilia, *5* (Abst.)
Eosinophils and goblet cells in nasal smear, relation of clinical nasal allergy to, 102 (Abst.)
Eosinophils, morphological changes in, in allergic disease (Connell), 1
Eosinophilotaxis, histamine, failure to elicit in skin of atopic man; improved technique (Felarca and Lowell), 82
Eosinotaxis, time-course, local effects of cortisol in with improved technique, 118 (Abst.)
Epidemic asthma, New Orleans; relationship between outbreaks and influx of ragweed pollen, 90 (Abst.)
Epinephrine and theophylline in animals sensitized to histamine by beta-adrenergic blockade corticosteroid enhancement of protective effect, 107 (Abst.)
contribution to death; review of asthmatic patients hospitalized in pavilion service of The New York Hospital from 1948 to 1963, with emphasis on mortality rate (Dworetzky and Philson), 181
immunosuppressive effect, and adjuvant effect, and adjuvant effect of beta-adrenergic blockade, 110 (Abst.)
infusion, metabolic response of asthmatic children to, 106 (Abst.)
norepinephrine, and beta-adrenergic blocking drugs, effect on anaphylactic histamine release in human leukocytes, 109 (Abst.)
Epoxy resin dermatitis, prevalence, *42* (Abst.)
Exercise, nasal airway response to (Richerson and Seebohm), 269
Exercise-induced bronchospasm in children, factors influencing, 93 (Abst.)
Exfoliative cytology of nasal secretions in infection and atopic disease, 102 (Abst.)

F

Fetal immunoglobulins; immunofluorescent indentification and localization in bone marrow, *46* (Abst.)
Fluoride, allergy to, *11* (Abst.)
Food, use of pei for normal, allergic, and potentially allergic children, *12* (Abst.)
FPL 670 (disodium cromoglycate) in bronchial asthma, double-blind study, 89 (Abst.)

G

Gamma E antibody, anti-, reversed allergic reactions in humans and monkeys with, 96 (Abst.)
Gliadin, antibodies to in serum of wheat-sensitive subject, purification with use of copolymerized gliadin as immunosorbent, 98 (Abst.)
Globulin and serum levels and gestational age in premature babies, *30* (Abst.)
gamma, anaphylactic reaction to in individual with acquired hypogammaglobulinemia, 118 (Abst.)
Glomectomy, current status, 89 (Abst.)
Glucocorticoid effects on in vitro histamine release and total blood histamine content, 110 (Abst.)
Glucose-2-C^{14}, D-, in vitro uptake into glycogen of diaphragm and formation of $C^{14}O_2$ from glucose-1-C^{14} by adipose tissue, effect of pertussis sensitization and pharmacological beta-adrenergic blockade on, 107 (Abst.)
Goblet cells and eosinophils in nasal smear, relation of clinical nasal allergy to, 102 (Abst.)
Graft-vs.-host reaction following a single blood transfusion, *21* (Abst.)
Granulomatous hepatitis associated with sulfadimethoxine hypersensitivity, *19* (Abst.)

H

Hay fever, ragweed, immunotherapy in (Koehler) (Lichtenstein and Norman), 237 (Correspondence)
repository therapy in (Prigal and Miller) (Norman and Winkenwerder), 176 (Correspondence)
seasonal, treatment, low molecular weight timothy pollen fraction in, 114 (Abst.)
Hemagglutination-inhibition test, rubella virus, 7 (Abst.)
Hemagglutinins, persistence following injection at varying intervals of alum-precipitated pyridine (Allpyral) ragweed pollen extracts, 116 (Abst.)
Hematocyanin, keyhole limpet (KLH), immunologic response to in atopic and normal individuals and those with family history of atopy, 101 (Abst.)
Hemolytic disease of newborn, prevention by anti-D serum given to mother, *48* (Abst.)
Hepatic injury, sulfonamide, *8* (Abst.)

Hepatitis, granulomatous, associated with sulfadimethoxine hypersensitivity, *19* (Abst.)
Heterologous antisera and antinuclear factors, competitive binding to human leukocytes, 105 (Abst.)
Histamine, animals sensitized to by beta-adrenergic blockade, corticosteroid enhancement of protective effect of epinephrine and theophylline in, 107 (Abst.)
aqueous, acute duodenal ulceration in guinea pig induced by repeated intramuscular injection, *20* (Abst.)
eosinophilotaxis, failure to elicit in skin of atopic man; improved technique (Felarca and Lowell), 82
in vitro antigenic release from leukocytes of allergic children, general features, 91 (Abst.)
release, anaphylactic, in human leukocytes, effect of epinephrine, norepinephrine, and beta-adrenergic blocking drugs on, 109 (Abst.)
in vitro, and total blood histamine content, glucocorticoid effects on, 110 (Abst.)
sensitivity: anaphylaxis in *Peromyscus leucopus* mice (Malkiel and Hargis), 246
Histamine-sensitizing and histidine decarboxylase–enhancing activities, dissociation, of *Bordetella pertussis* cell, 106 (Abst.)
Histidine decarboxylase–enhancing and histamine-sensitizing activities, dissociation, *Bordetella pertussis* cell, 106 (Abst.)
Histologic, immunologic, and clinical features of 50 untreated patients with Hodgkin's disease, *45* (Abst.)
Histopathologic changes in nasal biopsies and priming effect; quantitative pollen challenge VI, 101 (Abst.)
Hodgkin's disease; immunologic, clinical, and histologic features of 50 untreated patients, *45* (Abst.)
passive transfer of tuberculin sensitivity to patients with, *21* (Abst.)
Homologous passive cutaneous anaphylactic and fluorescent antibody reactions in rabbits infected with *Dirofilaria uniformis*, *22* (Abst.)
Humoral factors affecting pulmonary inflation during acute anaphylaxis in guinea pig in vivo, *7* (Abst.)
Hydralazine toxicity, antinuclear antibodies following, *4* (Abst.)
Hyman, Charles, obituary, 61
Hymenoptera, studies on; evolution of skin test in Hymenoptera-sensitive patients, 92 (Abst.)
Hypersensitivity, cutaneous, and desensitization to mechlorethamine in patients with mycosis fungoides lymphoma, *26* (Abst.)
Hypersensitivity—Cont'd
delayed, and antibody-synthesizing capacities, dissociation in man, *14* (Abst.)
atopic manifestations by measles vaccine, suppression, 111 (Abst.)
impaired lymphocyte transformation in Sjögren's syndrome, *47* (Abst.)
immunochemical characterization of low molecular weight cellular factor involved in in vivo and in vitro transfer, 112 (Abst.)
human lymphocyte migration as parameter, *31* (Abst.)
immediate type, in primate, model for study; ascaris hypersensitivity in rhesus monkey (Weiszer et al.), 14
Hypogammaglobulinemia, acquired, anaphylactic reaction to gamma globulin in individual with, 118 (Abst.)
Hyposensitization therapy, immunologic changes during, *42* (Abst.)

I

IgA, elevated, short stature, and asthma, identical twins with, *26* (Abst.)
IgE, radioactive tracing in DEAE fractions containing reagin, 96 (Abst.)
serum, association of grass pollen and horse dander reaginic activity with, 95 (Abst.)
IgM, 198, low molecular weight immunoglobulin antigenically related to, *46* (Abst.)
Immune deficiencies, asplastic anemia, and abnormalities of lymphoid tissue in thymoma, *29* (Abst.)
reactions, fate of antigen in, 100 (Abst.)
responses of human adults after oral and parenteral exposure to bovine serum albumin (Korenblat et al.), 226, 104 (Abst.)
Immunochemical characterization of low molecular weight cellular factor involved in in vivo and in vitro transfer of delayed hypersensitivity, 112 (Abst.)
Immunoglobulin(s), chemistry, *38* (Abst.)
class (IgND), new, raised levels in asthma, *34* (Abst.)
content of normal serum, *14* (Abst.)
fetal; immunofluorescent identification and localization in bone marrow, *46* (Abst.)
levels, development in man, 103 (Abst.)
low molecular weight, antigenically related to 19S IgM, *46* (Abst.)
Immunologic and clinical parameters in children receiving immunotherapy for ragweed hay fever, 116 (Abst.)
study of antigen E, three-year, 115 (Abst.)
changes during hyposensitization therapy, *42* (Abst.)
clinical, and histologic features of 50 untreated patients with Hodgkin's disease, *45* (Abst.)

Immunologic—Cont'd
memory of normal and leukemic lymphocyte, *30* (Abst.)
microbiologic, and clinical approach, correlative, to diagnosis of acute and chronic infections in newborn infants, *37* (Abst.)
response in experimental and human uremia, 103 (Abst.)
to keyhole limpet hematocyanin (KLH) in atopic and normal individuals and those with family history of atopy, 101 (Abst.)
tests, further studies on prediction of penicillin allergy by, 120 (Abst.)
Immunologically paralyzed mice, altered response to pneumococcal polysaccharide in offspring, *13* (Abst.)
Immunology; injection therapy (Lowell and Franklin), 174 (Correspondence)
Immunoreactive insulin (IRI), secretion by isolated perfused pancreas of normal and pertussis-sensitized rats, 122 (Abst.)
Immunosorbent, purification of antibodies to gliadin in serum of wheat-sensitive subject with use of copolymerized gliadin as, 98 (Abst.)
Immunosuppressive effect of epinephrine and adjuvant effect of beta-adrenergic blockade, 110 (Abst.)
therapy of chronic renal disease, *14* (Abst.)
relation between clinical response and immunologic competence, *31* (Abst.)
Immunotherapy in ragweed hay fever (Koehler) (Lichtenstein and Norman), 237 (Correspondence)
antibody response following: Allpyral vs. whole ragweed extract (Lichtenstein et al.), 49, 115 (Abst.)
Impaction sampler, simplified, with motion-regulated shielding; "fly-shield" rotobar (Solomon et al.), 290
Infants, newborn, correlative immunologic, microbiologic, and clinical approach to diagnosis of acute and chronic infections in, *37* (Abst.)
Injection therapy (Lowell and Franklin), 174 (Correspondence)
Insulin, immunoreactive (IRI), secretion by isolated perfused pancreas of normal and pertussis-sensitized rats, 122 (Abst.)
plasma, elevation in mice and rats resulting from *Bordetella pertussis* sensitization, 108 (Abst.)
Intrinsic factor and parietal cells, circulating antibodies to, incidence and significance in pernicious anemia, *48* (Abst.)
Investigational and therapeutic evaluation of asthmatic children (Chai et al.), 23
Iodide myxedema with facial swelling simulating angioneurotic edema, 120 (Abst.)
Isoprenaline, aerosol, effect on blood-gas tensions in severe bronchial asthma, *45* (Abst.)
Isoproterenol and isoproterenol-phenylephrine aerosols, effects on hypertensive asthmatic patients (Unger et al.), 285
nebulized, excessive, further studies of adverse effects in status asthmaticus, 118 (Abst.)

J

Jaffee, Isadore H., obituary, 346

K

Kidney transplants, chronic rejection, proteinuria and nephrotic syndrome associated with, *45* (Abst.)

L

Lability of dilutions of skin-sensitizing antibody and antigen (ragweed) on freezing, 98 (Abst.)
Lauer, Raymond M., obituary, 345
Leukemia; immunologic memory of normal and leukemic lymphocyte, *30* (Abst.)
Leukocytes of allergic children, general features of in vitro antigenic release of histamine from, 91 (Abst.)
human, anaphylactic histamine release in, effect of epinephrine, norepinephrine, and beta-adrenergic blocking drugs on, 109 (Abst.)
competitive binding of heterologous antisera and antinuclear factors to, 105 (Abst.)
of treated allergic patients, specific alterations in sensitivity of, 114 (Abst.)
Löffler's pneumonia terminating in fatal periarteritis nodosa, *29* (Abst.)
"Lung, mushroom worker's," *16* (Abst.)
Lymph node permiability factor, evidence for secretory product like produced by activated lymphoid cells, 112 (Abst.)
Lymphocyte(s), immunologic memory of normal and leukemic, *30* (Abst.)
migration, human, as parameter of hypersensitivity, *31* (Abst.)
ragweed-sensitive individuals, transformation in vitro in presence of ragweed allergen, 113 (Abst.)
in vitro blastogenic response (Richter and Naspitz), 140
transformation, impaired, and delayed hypersensitivity in Sjögren's syndrome, *47* (Abst.)
Lymphoid tissue abnormalities, immune deficiencies, and aplastic anemia in thymoma, *29* (Abst.)
Lymphopenic autoaggressive disease, treatment with chemically defined diet, 117 (Abst.)

M

Malabsorption syndrome, primary, intolerance to cow's milk and wheat gluten in, *27* (Abst.)
Measles vaccine, atopic manifestations and delayed hypersensitivity suppressed by, 111 (Abst.)
live, reactions to in children previously inoculated with killed measles vaccine, *47* (Abst.)
virus, attenuated, thrombocytopenic purpura following vaccination with, *47* (Abst.)
Mechlorethamine, cutaneous hypersensitivity and desensitization to in patients with mycosis fungoides lymphoma, *26* (Abst.)
Mercury-cadmium sensitivity in tattoos, *19* (Abst.)
Metabolic response of asthmatic children to epinephrine infusion, 106 (Abst.)
Metal sensitivity and duodenal ulcer, *32* (Abst.)
Methacholine, bronchial sensitivity to in normal and allergic rhinitis subjects, effect of beta-adrenergic blockade on, 108 (Abst.)
inhalation in bronchial asthma, effect of corticosteroids on, 93 (Abst.)
symptomatic bronchial asthma, effect of corticosteroids on (Arkins et al.), 209
Methyldopa, alpha-, red-cell antibody, nature, *29* (Abst.)
positive direct Coombs test and antinuclear factor in patients treated with, *40* (Abst.)
Microbial diseases, chronic, and endogenous uveitis, anti-DNA serum factors in, *22* (Abst.)
Migrainous attacks with persistent brain lesion: report of case, *8* (Abst.)
Milk, cow's, and wheat gluten, intolerance to in primary malabsorption syndrome in infancy, *27* (Abst.)
Mite, cable, dermatitis, investigation, *11* (Abst.)
Mold fungi in etiology of asthmatic children in Japan, *10* (Abst.)
Mongol families, autoimmune antibodies in, *30* (Abst.)
Mononucleosis, infectious, hypersensitivity reactions to antibacterial drugs in, *43* (Abst.)
Mosquito bites, specific, hypersensitive reactions in man to, *44* (Abst.)
"Mushroom worker's lung," *16* (Abst.)
Myxedema, iodide, with facial swelling simulating angioneurotic edema, 120 (Abst.)

N

Naled, occupational dermatitis from, *42* (Abst.)
Nasal airway response to exercise (Richerson and Seebohm), 269
Nasal—Cont'd
allergy, clinical, relation to eosinophils and to goblet cells in nasal smear, 102 (Abst.)
biopsies, priming effect and its relationship to histopathologic changes in; quantitative pollen challenge VI, 101 (Abst.)
membrane, effect of daily pollen challenge, environmental pollen exposure, and placebo challenge on; quantitative intranasal pollen challenge (Connell), 123
polyposis, double-blind labeled study of dexamethasone nasal aerosol vs. placebo in treatment (Drug Committee of the Research Council of the American Academy of Allergy), 10
secretions from allergic subjects, presence of bradykinin-like activity in, 103 (Abst.)
in infection and atopic disease, exfoliative cytology, 102 (Abst.)
Nebulization of N-acetylcysteine combined with bronchodilator in patients with chronic bronchitis; controlled study, 94 (Abst.)
Nebulized isoproterenol, excessive, further studies of adverse effects in status asthmaticus, 118 (Abst.)
Necrotizing angiitis, hypersensitivity to tobacco smoke as cause, *43* (Abst.)
Nephropathy, phenacetin, in mother and daughter, *13* (Abst.)
Nephrotic syndrome and proteinuria associated with chronic rejection of kidney transplants, *45* (Abst.)
secondary to systemic lupus erythematosus, antinuclear factors in, and in leprosy, *38* (Abst.)
Newborn, hemolytic disease, prevention by anti-D serum given to mother, *48* (Abst.)
Nitrogen mustard, effect on anaphylaxis in pertussis-vaccinated mouse, 106 (Abst.)

O

Obituaries, 61, 303, 345
Opiates, contribution to death; review of asthmatic patients hospitalized in pavilion service of The New York Hospital from 1948 to 1963, with emphasis on mortality rate (Dworetzky and Philson), 181
Oxygen administration by Venturi apparatus, effect on arterial blood gas values in patients with respiratory failure, *28* (Abst.)
therapy in respiratory failure, *28* (Abst.)

P

Pancreas, isolated perfused, of normal and pertussis-sensitized rats, secretion of immunoreactive insulin (IRI) by, 122 (Abst.)
Paraben contact dermatitis, *35* (Abst.)

Parietal cells and intrinsic factor, circulating antibodies to, incidence and significance in pernicious anemia, *48* (Abst.)
Parotid secretions from ragweed-sensitive patients, studies, 97 (Abst.)
Pei; its use as food for normal, allergic, and potentially allergic children, *12* (Abst.)
Penicillin allergy in children, 119 (Abst.)
prediction by immunological tests, further studies on, 120 (Abst.)
delayed skin-test reactions to, 111 (Abst.)
hypersensitivity system, studies with; correlation of blood eosinophilia with antibody classes, 119 (Abst.)
treatment of bacterial endocarditis in patients with, *4* (Abst.)
immediate reaction to, *35* (Abst.)
Penicilloyl antibody, quantitation by radioimmunoprecipitation, 105 (Abst.)
Periarteritis nodosa, fatal, Löffler's pneumonia terminating in, *29* (Abst.)
Pertussis, Bordetella, cell, dissociation of histamine-sensitizing and histidine decarboxylase–enhancing activities, 106 (Abst.)
sensitization, plasma insulin elevation in mice and rats resulting from, 108 (Abst.)
sensitization and pharmacological beta-adrenergic blockade, effect on in vitro uptake of D-glucose-2-C^{14} into glycogen of diaphragm and upon formation of $C^{14}O_2$ from glucose-1-C^{14} by adipose tissue, 107 (Abst.)
technique, sensitization by; anaphylaxis in *Peromyscus leucopus* mice (Malkiel and Hargis), 246
Pertussis-sensitized and normal rats, secretion of immunoreactive insulin (IRI) by isolated perfused pancreas, 122 (Abst.)
Pertussis-vaccinated mouse, effect of nitrogen mustard on anaphylaxis in, 106 (Abst.)
Phenacetin nephropathy in mother and daughter, *13* (Abst.)
Phenylephrine, isoproterenol-, and isoproterenol aerosols, effects on hypertensive asthmatic patients (Unger et al.), 285
Photoallergy to sandalwood oil, *27* (Abst.)
Photosensitivity; delayed reactions in positive photopatch tests to halogenated salicylanilides, *35* (Abst.)
Photosensitizer, new, *11* (Abst.)
Phytohemagglutinin concanavallin A, in vivo effects, 113 (Abst.)
Phytophotodermatitis (solar dermatitis from plants); gas plant and wild parsnip, *19* (Abst.)
Pigeon breeder's disease, cryptococcal antibodies in (Fink et al.), 297
Pituitary-adrenal function, recovery of in corticosteroid-treated children, 121 (Abst.)
Placental transfer of gastric antibodies, *6* (Abst.)
Plants, solar dermatitis from (phytophotodermatitis); gas plant and wild parsnip, *19* (Abst.)
Platinum salts, asthma caused by, 117 (Abst.)
Pneumococcal polysaccharide, altered response to in offspring of immunologically paralyzed mice, *13* (Abst.)
Pollen allergen, pyridine-extracted, alum-precipitated, rise in blocking antibodies in patients with, 115 (Abst.)
challenge, quantitative intranasal; effect of daily pollen challenge, environmental pollen exposure, and placebo challenge on nasal membrane (Connell), 123
VI, quantitative; priming effect and its relationship to histopathologic changes in nasal biopsies, 101 (Abst.)
extracts, new method for determining distribution of allergenic fractions in, 100 (Abst.)
(grass) and dander (horse) reaginic activity, association with serum IgE, 95 (Abst.)
Pollutants, air, changes in severity of symptoms of asthma and allergic rhinitis due to (Brown and Ipsen), 254
Pounders, Carroll M., obituary, 345
Pregnancy and asthma, *2* (Abst.)
Premature babies, serum and globulin levels and gestational age, *30* (Abst.)
Presidential address; allergy: current crisis (Vaughan), 241
Priming effect and its relationship to histopathologic changes in nasal biopsies; quantitative pollen challenge VI, 101 (Abst.)
Protein(s), allergenically active, Ra-3, isolation from short ragweed pollen, 100 (Abst.)
having reaginic activity, biological and chemical differences among (Reid et al.), 326
Proteinuria and nephrotic syndrome associated with chronic rejection of kidney transplants, *45* (Abst.)
Psychodelic experiences from stramonium poisoning in "teeny-boppers," *24* (Abst.)
Pulmonary inflation during acute anaphylaxis in guinea pig in vivo, humoral factors affecting, 7 (Abst.)
Pyridine (Allpyral), alum-precipitated, ragweed pollen extracts, serologic responses to; persistence of hemagglutinins following injections at varying intervals, 116 (Abst.)

Q

Quinic acid; allergenic immunodominant locus of chlorogenic acid, 99 (Abst.)

R

Radioimmunoprecipitation, quantitation of penicilloyl antibody by, 105 (Abst.)
Ragweed antibodies induced in nonatopic dogs, characterization, 104 (Abst.)
hay fever, antibody response following immunotherapy in: Allpyral vs. whole ragweed extract (Lichtenstein et al.), 49, 115 (Abst.)
clinical and immunologic parameters in children receiving immunotherapy for, 116 (Abst.)
in vitro passive sensitization of monkey ileum with absorbed globulin fractions from sera of patients sensitive to; demonstration of human reagin in monkey tissue (Wicher et al.), 74
globulin fractions from sera of patients sensitive to; demonstration of human reagin in monkey tissues (Wicher et al.), 63
pollen allergens, studies on, *34* (Abst.)
challenge, quantitative intranasal; effect of daily pollen challenge, environmetal pollen exposure, and placebo challenge on nasal membrane (Connell), 123
concentrations from background sources, effect of local source on (Raynor et al.), 217
extracts, alum-precipitated pyridine (Allpyral), serologic responses to; persistence of hemagglutinins following injection at varying intervals, 116 (Abst.)
influx, and outbreaks of New Orleans epidemic asthma, relationship between, 90 (Abst.)
short, isolation of allergenically active protein, Ra-3, from, 100 (Abst.)
pollinosis, use of alginate adjuvant as vehicle in treatment, *10* (Abst.)
Ragweed-sensitive individuals, in vitro blastogenic response of lymphocytes (Richter and Naspitz), 140
lymphocytes, transformation in vitro in presence of ragweed allergen, 113 (Abst.)
patients, studies of parotid secretions from, 97 (Abst.)
Reactivity to common contact allergens, group variation in, *3* (Abst.)
Reagin, human, demonstration in monkey tissues; in vitro passive sensitization of monkey ileum with absorbed globulin fractions from sera of patients sensitive to ragweed (Wicher et al.), 74
in vitro sensitization of monkey ileum with globulin fractions from sera of patients sensitive to ragweed (Wicher et al.), 63
of using monkey tissues; pharmacologic studies of in vitro passive sensitization of monkey ileum with sera from atopic patients (Kobayshi et al.), 152
Reagin—Cont'd
radioactive tracing of IgE in DEAE fractions containing, 96 (Abst.)
specificity in passive sensitization of monkey lung or skin suspensions, 97 (Abst.)
Reaginic activity, biological and chemical differences among proteins having (Reid et al.), 326
Renal disease, chronic, immunosuppressive therapy, *14* (Abst.)
Repository therapy in ragweed hay fever (Prigal and Miller) (Norman and Winkenwerder), 176 (Correspondence)
Respiratory arrest in asthma, *3* (Abst.)
disease in man, *Candida albicans* in (Pepys et al.), 305
failure, effect of oxygen administration by Venturi apparatus on arterial blood gas values in patients with, *28* (Abst.)
in childhood status asthmaticus; experience with 30 episodes and evolutions of technique, 94 (Abst.)
oxygen therapy in, *28* (Abst.)
Retinal edema secondary to oral contraceptives, *23* (Abst.)
Rhinitis, allergic, and asthma, changes in severity of symptoms due to air pollutants (Brown and Ipsen), 254
chronic staphylococcic infection in; treatment with autogenous vaccine, *16* (Abst.)
and normal subjects, effect of beta-adrenergic blockade on bronchial sensitivity to methacholine in, 108 (Abst.)
vasomotor, vidian nerve section for, *32* (Abst.)
Rh-negative daughters, sensitization by their Rh-positive mothers, *6* (Abst.)
Rohan, Mortimer B., obituary, 347
Rowe's Cereal-Free Diet 1, 2, 3, controlled study of effects on manifestations of chronic asthma of rigid elimination diet based on (Van Metre et al.), 195
Rubella virus hemagglutination-inhibition test, *7* (Abst.)
Rucks, Walker L., obituary, 303

S

Sammis, Florence E., obituary, 303
Sampler, impaction, simplified, with motion-regulated shielding; "fly-shield" rotobar (Solomon et al.), 290
Sandalwood oil, photoallargy to, *27* (Abst.)
Sensitization, in vitro, of human lung, monkey lung, and monkey ileum by sera from atopic patients, comparative study, 96 (Abst.)
monkey ileum with globulin fractions from sera of patients sensitive to ragweed; demonstration of human reagin in monkey tissues (Wicher et al.), 63

Sensitization, in vitro—Cont'd
passive, of monkey ileum with absorbed globulin fractions from sera of patients sensitive to ragweed; demonstration of human reagin in monkey tissues (Wicher et al.), 74
with sera from atopic patients, pharmacologic studies; demonstration of human reagin using monkey tissues (Kobayashi et al.), 152
of Rh-negative daughters by their Rh-positive mothers, *6* (Abst.)
passive, of monkey lung or skin suspensions, reagin specificity in, 97 (Abst.)
Serologic responses to alum-precipitated pyridine (Allpyral) ragweed pollen extracts; persistence of hemagglutinins following injection at varying intervals, 116 (Abst.)
Serum and globulin levels and gestational age in premature babies, *30* (Abst.)
factors, anti-DNA, in chronic microbial diseases and endogenous uveitis, *22* (Abst.)
Sjögren's syndrome, impaired lymphocyte transformation and delayed hypersensitivity, *47* (Abst.)
Skin reactions, delayed, to various fractions of streptokinase-streptodornase (Varidase), 112 (Abst.)
Skin-test reactions, delayed, to penicillin, 111 (Abst.)
Sleep studies in asthmatic adults: relationship of attacks to sleep stage and time of night (Kales et al.), 164
Spirometry and blood-gas tensions in bronchial asthma and chronic bronchitis, *11* (Abst.)
Spurges (Euphorbiaceae), immunology of cross-reactive allergy to, 99 (Abst.)
Sputum eosinophil content, midplane, full-chest tomograms, diffusion capacities, and other parameters in chronic asthma, bronchitis, and emphysema, 94 (Abst.)
Staphylococcic infection, chronic, in allergic rhinitis; treatment with autogenous vaccine, *16* (Abst.)
Status asthmaticus, severe, prolonged treatment with assisted ventilation Reisman et al.), 37
Steroids, increasing use of; review of asthmatic patients hospitalized in pavilion service of The New York Hospital from 1948 to 1963, with emphasis on mortality rate (Dworetzky and Philson), 181
intranasally applied, and adrenal suppression, *7* (Abst.)
Stramonium poisoning in "teeny-boppers," *24* (Abst.)
Streptokinase-streptodornase (Varidase), delayed skin reactions to various fractions, 112 (Abst.)
Sulfadimethoxine hypersensitivity, granulomatous hepatitis associated with, *19* (Abst.)
Sulfonamide hepatic injury, *8* (Abst.)
Swim training; its effect on asthmatic children, 92 (Abst.)
Swimming, controlled, in asthmatic children, evaluation of physiological and subjective data, 93 (Abst.)
Sympatho-adrenomedullary system in man, effect of coffee on function, *12* (Abst.)
Systemic allergic reactions to ingested antigens, 91 (Abst.)
lupus erythematosus, antinuclear factors in nephrotic syndrome secondary to and in leprosy, *38* (Abst.)
drug-induced, epidemiology, *23* (Abst.)

T

Tattoos, mercury-cadmium sensitivity in, *19* (Abst.)
Theophylline and epinephrine, corticosteroid enhancement of protective effect in animals sensitized to histamine by beta-adrenergic blockade, 107 (Abst.)
Theophylline-noscapine preparation, central nervous system reactions in allergic individuals with, *37* (Abst.)
Therapeutic and investigational evaluation of asthmatic children (Chai et al.), 23
Thrombocytopenic purpura following vaccination with attenuated measles virus, *47* (Abst.)
Thymic alymphoplasia: graft-vs.-host reaction following single blood transfusion, *21* (Abst.)
Thymoma, immune deficiencies, aplastic anemia, and abnormalities of lymphoid tissue in, *29* (Abst.)
Timothy pollen extracts, biologic properties of nonprecipitating antigen from, *15* (Abst.)
fraction, low molecular weight, in treatment of seasonal hay fever, 114 (Abst.)
Tobacco smoke, hypersensitivity to as cause of necrotizing angiitis, *43* (Abst.)
Tomograms, midplane and full-chest, diffusion capacities, sputum eosinophil content, and other parameters in chronic asthma, bronchitis, and emphysema, comparison, 94 (Abst.)
Tracheal chain, guinea pigs, effect of adrenergic blockade on, 109 (Abst.)
Tracing, radioactive, of IgE in DEAE fractions containing reagin, 93 (Abst.)
Transfer of delayed hypersensitivity, in vivo and in vitro, immunochemical characterization of low molecular weight cellular factor involved in, 112 (Abst.)
passive, of tuberculin sensitivity to patients with Hodgkin's disease, *21* (Abst.)
Transformation in vitro of lymphocytes of ragweed-sensitive individuals in presence of ragweed allergen, 113 (Abst.)

Tuberculin sensitivity, passive transfer to patients with Hodgkin's disease, *21* (Abst.)

U

Ulcer of lip, drug-induced, *27* (Abst.)
Ulceration, acute duodenal, in guinea pig induced by repeated intramuscular injection of aqueous histamine, *20* (Abst.)
Uremia, experimental and human, immunologic response in, 103 (Abst.)
Urticaria from contact with water, *36* (Abst.)
papular, insect repellents and seasonal variation, *27* (Abst.)
Uveitis, endogenous, and chronic microbial diseases, anti-DNA serum factors in, *22* (Abst.)

V

Vaccination with attenuated measles virus, thrombocytopenic purpura following, *47* (Abst.)
Vaccine, live measles, reactions to in children previously inoculated with killed measles vaccine, *47* (Abst.)
Vacuolization of eosinophils in allergic disease (Connell), 1
Varidase (streptokinase-streptodornase), delayed skin reactions to various fractions, 112 (Abst.)
Ventilation, assisted, prolonged treatment with; severe status asthmaticus (Reisman et al.), 37
Vidian nerve section for vasomotor rhinitis, *32* (Abst.)

W

Water, urticaria from contact with, *36* (Abst.)
Wheat gluten and cow's milk, intolerance to in primary malabsorption syndrome in infancy, *27* (Abst.)
Wheat-sensitive subject, purification of antibodies to gliadin in serum with use of copolymerized gliadin as immunosorbent, 98 (Abst.)
Wiseman, Richard D., obituary, 304

Subject index*

A

Abnormality, atopic, in bronchial asthma, beta adrenergic theory (Szentivanyi), 203

Acetylcholine and isoprenalin, effects, on pulmonary circulation in bronchial asthma, *26* (Abst.)

Acid levels, serum uric, in patients with bronchial asthma (Harter), 88

Acidosis, respiratory, renal excretion of sodium and bicarbonate following $NaHCO_3$ infusion in patients with, *3* (Abst.)

Adenitis, submandibular, due to iodide administration, *39* (Abst.)

Administration, iodide, submandibular adenitis due to, *39* (Abst.)

long-term, of cortisone and anabolic steroids in asthmatic subject, body composition during, *38* (Abst.)

oxygen, in respiratory failure, studies, *37* (Abst.)

Adrenal cortical glucocorticoid function in asthmatic children, *18* (Abst.)

Adrenaline in bronchial asthma, *10* (Abst.)

Adrenergic, beta, blockade, bronchial asthma and atopy (Reed), 238 (Edit.)

theory, of atopic abnormality in bronchial asthma (Szentivanyi), 203

blockade, beta-, bronchial response to exercise following (Zaid et al.), 177

Adrenocortical response to stress, effects of diurnal variation in plasma corticosterone levels on, *20* (Abst.)

responsiveness after alternate-day corticosteroid therapy, *20* (Abst.)

Aerosols, active-specific local and systemic densensitization of antigen by (Swineford), 9

of antigen, active sensitization of guinea pigs by inhalation of, *7* (Abst.)

Air conditioning, and central air filtration, effect, on pollen and microbial contamination (Spiegelman and Friedman), 193

filtration, central, and air conditioning, effect, on pollen and microbial contamination (Spiegelman and Friedman), 193

Airway obstruction before and after isuprenaline, histamine, and prednisolone in patients with chronic obstructive bronchitis, *38* (Abst.)

Allergen antibodies, in-vitro test for, diagnosis of allergy by, *6* (Abst.)

castor-bean, detection of IgE (IgND) specific (probably reagin) to, by red-cell linked antigen-antiglobulin reaction, *45* (Abst.)

Allergic contact dermatitis due to formaldehyde fingernail hardener, *35* (Abst.)

encephalomyelitis, repeated passive transfers, altered distribution of lesions after, *30* (Abst.)

respiratory disease, "intrinsic," studies on, with hypothesis concerning its pathogenesis (Schwartz et al.), 169

rhinitis, effect of antihistamines of nasal smear eosinophiles in patients with, *16* (Abst.)

Alpha-1 fetoglobulin in diagnosis of human hepatoma, *44* (Abst.)

Alternate-day corticosteroid therapy, adrenocortical responsiveness after, *20* (Abst.)

Amantadine treatment, antibody response in rabbits to antigenic stimulation during, *46* (Abst.)

American Academy of Allergy, Historian's report, 49

Aminophylline in bronchial asthma, *11* (Abst.)

Anabolic steroids, and cortisone, in asthmatic subject, body composition during long-term administration, *38* (Abst.)

Analgesic action, and transport, of sodium salicylates, effect of insulin on, *39* (Abst.)

Anaphylactic death from methylglucamine and sodium diatrizoate (Renovist), *12* (Abst.)

reaction to dextrans, *13* (Abst.)

Anaphylaxis, consideration in differential diagnosis of shock (Booth and Patterson), 364 (Brief communications)

recurrent, caused by misidentified drug, *13* (Abst.)

Anemia, pernicious, immunologic heterogeneity of autoantibodies, in patients with, *22* (Abst.)

Animal dander hyposensitization, observations on, *34* (Abst.)

*July, pp. 1-62; August, pp. 63-112; September, pp. 113-176; October, pp. 177-248; November, pp. 249-308; December, pp. 309-388.

Abstracts: July, pp. *1-8*; August, pp. *9-16*; September, pp. *17-24*; October, pp. *25-32*; November, pp. *33-40*; December, pp. *41-48*.

Announcements, 60, 112, 248, 307, 368
Antibody(ies), allergen, in-vitro test for, diagnosis of allergy by, *6* (Abst.)
and antigen (ragweed), skin-sensitizing, lability of dilution, on freezing (Feinberg et al.), 157
deficiency syndrome, clinical considerations, *40* (Abst.)
formation, induction of, and tolerance in-vitro to a purified protein antigen, *7* (Abst.)
in vitro, requirement for two cell types for, *23* (Abst.)
human antipenicillin skin-sensitizing, heterogeneity of (Shibata et al.), 63
reaginic, and immunoglobulin E (Ishizaka and Ishizaka), 330
IgE (IgND) specific (probably reagin), detection to castor-bean allergen by red-cell linked antigen-antiglobulin reaction, *45* (Abst.)
-inducing effects of aqueous and depot influenza vaccines in elderly, *29* (Abst.)
milk, absence, in milk intolerance in adults, *13* (Abst.)
response following injections with *M. tuberculosis*, *46* (Abst.)
in medical students, effect of dosage and influenza vaccine content on, *5* (Abst.)
in rabbits to antigenic stimulation during amantadine treatment, *46* (Abst.)
skin-sensitizing, disappearance rate, after intradermal administration (Cass and Andersen), 29
specific heterophile, from infectious mononucleosis serum, further characterization, *31* (Abst.)
Antigen(s), aerosols, active sensitization of guinea pigs by inhalation, *7* (Abst.)
-antiglobulin reaction, red-cell linked, detection of IgE (IgND) specific antibody (probably reagin) to castor-bean allergen by, *45* (Abst.)
causative, in bronchial asthma, allergenic identity between house dust and common floor mite (*Dermatophagoides farinae*) (Miyamoto et al.), 14
common mold, cross-antigenicity of, *15* (Abst.)
desensitization, by aerosols (Swineford), 9
E, ragweed, immunotherapy with, comparisons with whole pollen extract and placebos (Norman et al.), 93
interaction in delayed hypersensitivity, cytotoxic effect of lymphocyte, *22* (Abst.)
purified protein, tolerance in-vitro to, and induction of antibody formation, *7* (Abst.)
(ragweed) and antibody, skin-sensitizing, lability of dilutions, on freezing (Feinberg et al.), 157
skin test, depression of delayed allergic response to, study of immune mechanisms in leprosy, *24* (Abst.)
Antigenic stimulation during amantadine treatment, antibody response in rabbits to, *46* (Abst.)
Antiglobulin-antigen reaction, red-cell linked, detection of IgE (IgND) specific antibody (probably reagin) to castor-bean allergen by, *45* (Abst.)
Antihistamines of nasal smear eosinophiles, effect of, in patients with allergic rhinitis, *16* (Abst.)
Antilymphocyte globulin, site of action, *20* (Abst.)
Antinuclear reactivity and rheumatoid factor, association with impaired delayed hypersensitivity in aging population, *14* (Abst.)
Antipenicillin, human, skin-sensitizing antibodies, heterogeneity (Shibata et al.), 63
Aqueous and depot influenza vaccines, antibody-inducing effects, in elderly, *29* (Abst.)
Arterial-blood gas tension in asthma, *42* (Abst.)
Asthma, arterial-blood gas tension in, *42* (Abst.)
bronchial, adrenaline in, *10* (Abst.)
allergenic identity between common floor mite (*Dermatophagoides farinae*) and house dust as causative antigen in (Miyamoto et al.), 14
aminophylline in, *11* (Abst.)
and atopy, beta adrenergic blockade (Reed), 238 (Edit.)
beta adrenergic theory of atopic abnormality in (Szentivanyi), 203
in children, study of natural history, *2* (Abst.)
chloroquine in treatment, *10* (Abst.)
metabolic response to epinephrine in (Middleton and Finke), 288
mites and house dust allergy in, *43* (Abst.)
pulmonary circulation in, effects of acetylcholine and isoprenalin on, *26* (Abst.)
and recurrent pneumonia in children, clinical evaluation of 14 children, *26* (Abst.)
serum uric acid levels in patients with (Harter), 88
clinical trial of disodium cromoglycate in treatment of children with, *34* (Abst.)
comments on articles by Tabb and Guerrant and Wood et al. (Arbesman et al.) (Arkins and Schlueter) (Beaudry) (Bernstein) (Bukantz) (Falliers) (Franklin) (Seebohm) (Siegel and Richards), 268
death, from investigation into use of drugs preceding, *18* (Abst.)
known and unknown origin, methacholine (Mecholyl) sensitivity in patients with, effect of influenza vaccine on (Anand et al.), 187
life-threatening (Tabb and Guerrant), 249

Asthma—Cont'd
management of respiratory failure in childhood status asthmaticus, experience with 30 episodes and evolution of technique (Wood et al.), 261
observations on recent increase in mortality from, *10* (Abst.)
perennial bronchial, value of inhalation tests in (Popa et al.), 130
pulmonary emboli masquerading as, *35* (Abst.)
Asthmatic children, adrenal cortical glucocorticoid function in, *18* (Abst.)
subject, body composition during long-term administration of cortisone and anabolic steroids in, *38* (Abst.)
Asthmaticus, status, management of respiratory failure in, experience with 30 episodes and evolution of technique (Wood et al.), 261
Atopic abnormality in bronchial asthma, beta adrenergic theory (Szentivanyi), 203
dermatitis, and familial neural hearing loss, *27* (Abst.)
serum complement (β_{1c}) in young children with (Kaufman et al.), 1
Atopy, and bronchial asthma, beta adrenergic blockade (Reed), 238 (Edit.)
in dog, *11* (Abst.)
Autoantibodies in patients with pernicious anemia, immunologic heterogeneity of, *22* (Abst.)
Autoantibody to intrinsic factor, blocking and binding, *38* (Abst.)
Azathioprine, immunosuppressive drug, prevention of corneal-graft failure with, *5* (Abst.)

B

Bacigaluppi, Emilio E., 176 (Obit.)
Bagasse worker's lung disease, pulmonary function in, *37* (Abst.)
Bee envenomation, effect, on local tissue response in varicella (Hess), 300 (Brief communications)
Beta adrenergic blockade, bronchial asthma and atophy (Reed), 238 (Edit.)
response to exercise following (Zaid et al.), 177
theory of atopic abnormality in bronchial asthma (Szentivanyi), 203
Bicarbonate and sodium, renal excretion of, following $NaHCO_3$ infusion in patients with respiratory acidosis, *3* (Abst.)
Binding, and blocking, autoantibody to intrinsic factor, *38* (Abst.)
and shering by mononuclear cells in man, red cells coated with immunoglobulin G, *23* (Abst.)
Blockade, beta adrenergic, bronchial asthma and atopy (Reed), 238 (Edit.)
response to exercise following (Zaid et al.), 177
Blocking and binding autoantibody to intrinsic factor, *38* (Abst.)
Blood gas, arterial-, tension in asthma, *42* (Abst.)
Body composition during long-term administration of cortisone and anabolic steroids in asthmatic subject, *38* (Abst.)
Boosters, tetanus toxoid, excessive use, *16* (Abst.)
Brief communications, 233, 300, 364
Bronchial asthma, adrenaline in, *10* (Abst.)
allergenic identity between common floor mite (*Dermatophagoides farinae*) and house dust as causative antigen in (Miyamoto et al.), 14
aminophylline in, *11* (Abst.)
and atopy, beta adrenergic blockade (Reed), 238 (Edit.)
beta adrenergic theory of atopic abnormality in (Szentivanyi), 203
in children, study of natural history, *2* (Abst.)
chloroquine in treatment of, *10* (Abst.)
metabolic response to epinephrine in (Middleton and Finke), 288
mites and house dust allergy in, *43* (Abst).
perennial, value of inhalation tests in (Popa et al.), 130
pulmonary circulation in, effects of acetylcholine and isoprenalin on, *26* (Abst.)
and recurrent pneumonia in children, clinical evaluation of 14 children, *26* (Abst.)
serum uric acid levels in patients with (Harter), 88
response to exercise following beta-adrenergic blockade (Zaid et al.), 177
Bronchitis, chronic obstructive, airway obstruction before and after isuprenaline, histamine, and prednisolone in patients with, *38* (Abst.)
Bronchodilator, soterenol, efficacy, on experimental locked-lung syndrome in dogs (Cho et al.), 36
Bronchospasm by exercise, effect of influenza vaccine upon susceptibility to induction (Sly and Schlumbrecht), 182

C

Castor-bean allergen, detection of IgE (IgND) specific antibody (probably reagin) to, by red-cell linked antigen-antiglobulin reaction, *45* (Abst.)
Catecholamines, and methylxanthines, inhibition by, histamine release in vitro, *44* (Abst.)
Celiac disease, deficiency of gamma M-globulin in, *48* (Abst.)
Cell responses to particles of delineated size, experimental eosinophilia, *14* (Abst.)
Cells, mast, electron microscope study of immediate hypersensitivity reaction in, *47* (Abst.)
mononuclear, binding and shering by, in man, red cells coated with immunoglobulin G, *23* (Abst.)

Cells—Cont'd
rectal mucosal epithelial, immunoglobulin A localization in, *4* (Abst.)
red, coated with immunoglobulin G, binding and shering by mononuclear ceils in man, *23* (Abst.)
spleen, primary immune response in cultures, *6* (Abst.)
Cellular hypersensitivity, in vitro detection, in man, *32* (Abst.)
Cereal free diet 1, 2, 3 (Rowe and Rowe) (Van Metre et al.), 243 (Correspondence)
Chemicals, industrial, progress in detecting worker hypersusceptible to, *37* (Abst.)
Chloroquine in treatment of bronchial asthma, *10* (Abst.)
Circulation, pulmonary, in bronchial asthma, effects of acetylcholine and isoprenalin on, *26* (Abst.)
Complement and complexes, immune, role, in tissue injury (Cochrane), 113
fixation, deficient, by aggregated gamma globulin from hypogammaglobulinemic patients, *4* (Abst.)
(β_{1c}) serum, in young children with atopic dermatitis (Kaufman et al.), 1
Complexes and complement, immune, role, in tissue injury (Cochrane), 113
Composition, body, during long-term administration of cortisone and anabolic steroids in asthmatic subject, *38* (Abst.)
Congenital thymic dysplasia, lymphocyte studies in, one-way stimulation test, *30* (Abst.)
Contact dermatitis, allergic, due to formaldehyde fingernail hardener, *35* (Abst.)
Contamination, microbial, and pollen, effect of central air filtration and air conditioning on (Spiegelman and Friedman), 193
Contraceptives, oral, sunlight sensitivity from, *3* (Abst.)
Coombs test positively induced by drugs, mechanisms of immunologic and red cell destruction, *21* (Abst.)
Coproantibodies to milk and wheat proteins, two cases with, gluten intolerance following cow's milk sensitivity, *36* (Abst.)
Corneal-graft failure, prevention, with immunosuppressive drug azathioprine, *5* (Abst.)
Correspondence, 109, 243, 304
Cortical glucocorticoid function, adrenal, in asthmatic children, *18* (Abst.)
Corticosteroid therapy, alternate-day, adrenocortical responsiveness after, *20* (Abst.)
Corticosterone levels, plasma, effects of diurnal variation in, on adrenocortical response to stress, *20* (Abst.)
Cortisone and anabolic steroids in asthmatic subject, body composition during long-term administration, *38* (Abst.)
Cow's milk sensitivity, gluten intolerance following, two cases with coproantibodies to milk and wheat proteins, *36* (Abst.)
Creams, and ointments, differences in sensitizing capacity of neomycin in, *43* (Abst.)
Cromoglycate, disodium, in treatment of children with asthma, clinical trial, *34* (Abst.)
Cross-antigenicity of common mold antigens, *15* (Abst.)
Culture components, sensitizing tissue, in viral vaccines, detection (Wilson et al.), 319
leukocyte, detection of tuberculin sensitivity by, in children, *29* (Abst.)
Cutaneous and mucosal neoplasms, immunotherapy, tumors of skin, *27* (Abst.)
Cytotoxic effect of lymphocyte, antigen interaction in delayed hypersensitivity, *22* (Abst.)

D

Dander hyposensitization, animal, observations on, *34* (Abst.)
Davidson, Marion T., 308 (Obit.)
Deficiency syndrome, antibody, clinical considerations, *40* (Abst.)
Demethylchlortetracycline and Doxycycline, photosensitivity studies with, *12* (Abst.)
Depot, and aqueous, influenza vaccines, antibody-inducing effects, in elderly, *29* (Abst.)
Dermal hypersensitivity, delayed, following killed measles vaccine, *6* (Abst.)
Dermatitis, allergic contact, due to formaldehyde fingernail hardener, *35* (Abst.)
atopic, and familial neural hearing loss, *27* (Abst.)
serum complement β_{1c} in young children with (Kaufman et al.), 1
ethylenediamine contact, *2* (Abst.)
photosensitive, from soaps, *11* (Abst.)
spandex, *19* (Abst.)
Dermatophagoides farinae, common floor mite, allergenic identity between house dust and, as causative antigen in bronchial asthma (Miyamoto et al.), 14
Dermatosis in lobster fishermen, *19* (Abst.)
Desensitization, active-specific local and systemic, by aerosols of antigen (Swineford), 9
Dexamethasone, intranasal, effect, on skin tests, *32* (Abst.)
Dextrans, anaphylactic reaction to, *13* (Abst.)

Diagnosis, differential, of shock, consideration in, anaphylaxis (Booth and Patterson), 364 (Brief communications)
Diagnostic tool in pediatric allergy, skin window as, *35* (Abst.)
Differential diagnosis of shock, consideration in, anaphylaxis (Booth and Patterson), 364 (Brief communications)
Diet, cereal free, 1, 2, 3 (Rowe and Rowe) (Van Metre et al.), 243 (Correspondence)
Dilutions of skin-sensitizing antibody and antigen (ragweed), lability, on freezing (Feinberg et al.), 157
Disappearance rate of skin-sensitizing antibody activity after intradermal administration (Cass and Andersen), 29
Disease, bagasse worker's lung, pulmonary function in, *37* (Abst.)
pigeon breeders', *43* (Abst.)
respiratory, significance of mold spore allergy in, *34* (Abst.)
Disodium cromoglycate in treatment of children with asthma, clinical trial, *34* (Abst.)
Diurnal variation, effects, in plasma corticosterone levels on adrenocortical response to stress, *20* (Abst.)
Dosage and influenza vaccine content, effect, on antibody response in medical students, *5* (Abst.)
Doxycycline and demethylchlortetracycline, photosensitivity studies with, *12* (Abst.)
Drug(s), immune, suppressive studies on, *36* (Abst.)
immunosuppressive azathioprine, prevention of corneal-graft failure with, *5* (Abst.)
investigation into use of, preceding death from asthma, *18* (Abst.)
misidentified, recurrent anaphylaxis caused by, *13* (Abst.)
Dust, house, allergenic identity between common floor mite and, as causative antigen in bronchial asthma (Miyamoto et al.), 14
allergy, and mites, in bronchial asthma, *43* (Abst.)
and mites (Perlman), 304 (Correspondence)
Dysplasia, congenital thymic, lymphocyte studies in, one-way stimulation test, *30* (Abst.)

E

Emboli, pulmonary, masquerading as asthma, *35* (Abst.)
Electron microscope study of immediate hypersensitivity reaction in mast cells, *47* (Abst.)
Encephalomyelitis, allergic, repeated passive transfers, altered distribution of lesions after, *30* (Abst.)
Envenomation, bee, effect, on local tissue response in varicella (Hess), 300 (Brief communications)
Eosinophiles, nasal smear, antihistamines, effect, in patients with allergic rhinitis, *16* (Abst.)
Eosinophilia, experimental, cell responses to particles of delineated size, *14* (Abst.)
Eosinophilotaxis and histamine (Archer) (Lowell), 109 (Correspondence)
Ephedrine psychosis, *32* (Abst.)
Epithelial cells, rectal mucosal, immunoglobulin A localization in, *4* (Abst.)
Epinephrine, metabolic response to, in bronchial asthma (Middleton and Finke), 288
Erythematosus, systemic lupus, *28* (Abst.)
immunologic factors and clinical activity in, *47* (Abst.)
Erythrocyte destruction and immunologic reactions, mechanisms of, Coombs test positively induced by drugs, *21* (Abst.)
stroma receptors, solubilized, penicillin or its derivatives with, elicitation of skin test reactions by complexes (Mathews and Pan), 74
Ethiopian preschool children, immunoglobulin levels in, with special reference to high concentration of immunoglobulin E (IgND), *39* (Abst.)
Ethylenediamine contact dermatitis, *2* (Abst.)
Exercise, bronchial response to, following beta-adrenergic blockade (Zaid et al.), 177
bronchospasm by, effect of influenza vaccine upon susceptibility to induction (Sly and Schlumbrecht), 182
Excretion, renal, of sodium and bicarbonate following $NaHCO_3$ infusion in patients with respiratory acidosis, *3* (Abst.)

F

Factor, intrinsic, autoantibody to, blocking and binding, *38* (Abst.)
Familial neural hearing loss and atopic dermatitis, *27* (Abst.)
Farinae, Dermatophagoides, common floor mite, allergenic identity between house dust and, as causative antigen in bronchial asthma (Miyamoto et al.), 14
Fetal thymus, human, ultrastructure, *14* (Abst.)
Fetoglobulin, alpha-1, in diagnosis of human hepatoma, *44* (Abst.)
Filtration, central air, and air conditioning, effect, on pollen and microbial contamination (Spiegelman and Friedman), 193
Fingernail hardener, formaldehyde, allergic contact dermatitis due to, *35* (Abst.)

Fixation, deficient complement, by aggregated gamma globulin from hypogammaglobulinemic patients, *4* (Abst.)
Flora, normal, evidence suggesting importance of role of interbacterial inhibition in maintaining balance of, *8* (Abst.)
Formaldehyde fingernail hardener, *t* allergic contact dermatitis due to, *35* (Abst.)
Freezing, lability of dilutions of skin-sensitizing antibody and antigen (ragweed) on (Feinberg et al.), 157

G

Gamma globulin, aggregated, from hypogammaglobulinemic patients, deficient complement fixation by, *4* (Abst.)
role, for immunoprophylaxis in multiple myeloma, *21* (Abst.)
M-globulin in celiac disease, deficiency, *48* (Abst.)
Gastrointestinal tract, roentgen changes in, Schönlein-Henoch syndrome, *28* (Abst.)
Globulin, antilymphocyte, site of action, *20* (Abst.)
gamma M-, deficiency, in celiac disease, *48* (Abst.)
Glucocorticoid function, adrenal cortical, in asthmatic children, *18* (Abst.)
induced pancreatitis in children, *29* (Abst.)
Gluten intolerance following cow's milk sensitivity, two cases with coproantibodies to milk and wheat proteins, *36* (Abst.)
Grossmann, Herbert O., 61 (Obit.)

H

Hay fever, immunotherapy with ragweed antigen E, comparisons with whole pollen extract and placebos (Norman et al.), 93
Hearing loss, familial neural, and atopic dermatitis, *27* (Abst.)
Hepatoma, human, alpha-1 fetoglobulin in diagnosis, *44* (Abst.)
Hereditary, sex-linked, thrombocytopenia as variant of Wiskott-Aldrich syndrome, *3* (Abst.)
Heterogeneity of human antipenicillin skin-sensitizing antibodies (Shibata et al.), 63
immunologic, of autoantibodies, in patients with pernicious anemia, *22* (Abst.)
Heterophile antibody, specific, from infectious mononucleosis serum, further characterization, *31* (Abst.)
Hill, Lewis Webb, 367 (Obit.)
Histamine and eosinophilotaxis (Archer) (Lowell), 109 (Correspondence)
in foods causing false positive scratch tests (Doeglas and Nater), 164
isuprenaline, and prednisolone, airway obstruction before and after, in patients with chronic obstructive bronchitis, *38* (Abst.)
release in vitro, inhibition by catecholamines and methylxanthines, *44* (Abst.)
Historian's report, American Academy of Allergy, 49
History, natural, of bronchial asthma in children, study, *2* (Abst.)
House dust allergy, and mites, in bronchial asthma, *43* (Abst.)
and mites (Perlman), 304 (Correspondence)
Hypereosinophilic syndromes, *44* (Abst.)
Hypersensitivity, cellular, in vitro detection, in man, *32* (Abst.)
delayed, antigen interaction in, cytotoxic effect of lymphocyte, *22* (Abst.)
dermal, following killed measles vaccine, *6* (Abst.)
preferential development by mice, to purified basic proteins (Crowle et al.), 140
impaired delayed, in aging population, association with antinuclear reactivity and rheumatoid factor, *14* (Abst.)
reaction in mast cells, immediate, electron microscope study, *47* (Abst.)
Hypogammaglobulinemic patients, deficient complement fixation by aggregated gamma globulin from, *4* (Abst.)
Hyposensitization, animal dander, observations on, *34* (Abst.)

I

IgA deficiency in infant and susceptibility of infection, *15* (Abst.)
system, IgA levels in serum and saliva of pediatric patients, evidence for local immunological system, *7* (Abst.)
IgE (IgND) specific antibody (probably reagin), detection, to castor-bean allergen by red-cell linked antigen-antiglobulin reaction, *45* (Abst.)
IgND, IgE, specific antibody (probably reagin), detection, to castor-bean allergen by red-cell linked antigen-antiglobulin reaction, *45* (Abst.)
immunoglobulin E, immunoglobulin levels in Ethiopian preschool children with special reference to high concentration, *39* (Abst.)
Immune complexes and complement, role in tissue injury (Cochrane), 113
mechanisms, study, in leprosy, depression of delayed allergic response to skin test antigens, *24* (Abst.)
response, primary, in cultures or spleen cells, *6* (Abst.)
suppressive drugs, studies on, *36* (Abst.)
Immunization, attenuated measles virus, in childen who previously received a combination of inactivated and attenuated vaccines, altered reactivity to measles virus, *48* (Abst.)
Immunoglobulin A, localization in rectal mucosal epithelial cells, *4* (Abst.)
E, and human reaginic antibodies (Ishizaka and Ishizaka), 330

Immunoglobulin—Cont'd
(IgND), immunoglobulin levels in Ethiopian preschool children with special reference to high concentration, *39* (Abst.)
new class of human immunoglobulin, 305
G, red cells coated with, binding and shering by mononuclear cells in man, *23* (Abst.)
human, new class, immunoglobulin E, 305
levels in Ethiopian preschool children with special reference to high concentration of immunoglobulin E (IgND), *39* (Abst.)
in healthy children, *31* (Abst.)
Immunologic factors and clinical activity in systemic lupus erythematosus, *47* (Abst.)
reactions and red cell destruction, mechanisms, Coombs test positively induced by drugs, *21* (Abst.)
Immunological system, local, IgA levels in serum and saliva of pediatric patients, evidence for, *7* (Abst.)
Immunoprophylaxis, role of gamma globulin for, in multiple myeloma, *21* (Abst.)
Immunosuppressive drug, azathioprine, prevention of corneal-graft failure with, *5* (Abst.)
Immunotherapy of cutaneous and mucosal neoplasms, tumors of skin, *27* (Abst.)
of hay fever with ragweed antigen E, comparisons with whole pollen extract and placebos (Norman et al.), 93
Industrial chemicals, progress in detecting worker hypersusceptible to, *37* (Abst.)
Infectious mononucleosis serum, specific heterophile antibody from, further characterization, *31* (Abst.)
Influenza vaccines, aqueous and depot, antibody-inducing effects, in elderly, *29* (Abst.)
content and dosage, effect, on antibody response in medical students, *5* (Abst.)
effect, on methacholine (Mecholyl) sensitivity in patients with asthma of known and unknown origin (Anand et al.), 187
upon susceptibility to induction of bronchospasm by exercise (Sly and Schlumbrecht), 182
Inhalation tests, value of in perennial bronchial asthma (Popa et al.), 130
Inhibition, interbacterial, evidence suggesting importance of role, in maintaining balance of normal flora, *8* (Abst.)
Injection with *M. tuberculosis*, antibody response following, *46* (Abst.)
Interbacterial inhibition, evidence suggesting importance of role of, in maintaining balance of normal flora, *8* (Abst.)
Intradermal administration, disappearance rate of skin-sensitizing antibody activity after (Cass and Andersen), 29
Isoprenalin, and acetylcholine, effects, on pulmonary circulation in bronchial asthma, *26* (Abst.)
Insulin, effect, on transport and analgesic action of sodium salicylates, *39* (Abst.)
Intranasal dexamethasone, effect, on skin tests, *32* (Abst.)
Intrinsic allergic respiratory disease, studies on, with hypothesis concerning its pathogenesis (Schwartz et al.), 169
factor antibody to, blocking and binding, *38* (Abst.)
Iodide administration, submandibular adenitis due to, *39* (Abst.)
Isuprenaline, histamine, and prednisolone, airway obstruction before and after, in patients with chronic obstructive bronchitis, *38* (Abst.)

K

Knight, Beatrice Payne, 111 (Obit.)

L

Lability of dilutions of skin-sensitizing antibody and antigen (ragweed) on freezing (Feinberg et al.), 157
Larva currens strongyloidiasis, linear urticaria due to, *42* (Abst.)
Leprosy, study of immune mechanisms in, depression of delayed allergic response to skin test antigens, *24* (Abst.)
Lesions, altered distribution, after repeated passive transfers of allergic encephalomyelitis, *39* (Abst.)
Leukocyte culture, detection of tuberculin sensitivity by, in children, *29* (Abst.)
Life-threatening asthma (Tabb and Guerrant), 249
Linear urticaria due to larva currens strongyloidiasis, *42* (Abst.)
Local tissue response in varicella, effect of bee envenomation on (Hess), 300 (Brief communications)
Locked-lung syndrome, in dogs, efficacy of bronchodilator, soterenol, on (Cho et al.), 36
Lung, bagasse worker's, *29* (Abst.)
disease, bagasse worker's, pulmonary function in, *37* (Abst.)
Lupus erythematosus, systemic, *28* (Abst.)
immunologic factors and clinical activity in, *47* (Abst.)
Lymphocyte, cytotoxic effect, antigen interaction in delayed hypersensitivity, *22* (Abst.)
studies in congenital thymic dysplasia, one-way stimulation test, *30* (Abst.)

M

Mast cells, electron microscope study of immediate hypersensitivity reaction in, *47* (Abst.)
Measles vaccine, killed, delayed dermal hypersensitivity following, *6* (Abst.)
virus, altered reactivity to, local reactions following attenuated measles virus immunization in children who previously received a combination of inactivated and attenuated vaccines, *48* (Abst.)
Mecholyl, methacholine, sensitivity in patients with asthma of known and unknown origin, effect of influenza vaccine on (Anand et al.), 187
Metabolic response to epinephrine in bronchial asthma (Middleton and Finke), 288
Methacholine (Mecholyl) sensitivity in patients with asthma of known and unknown origin, effect of influenza vaccine on (Anand et al.), 187
Methacillin therapy, nephropathy with, *8* (Abst.)
Methylglucamine and sodium diatrizoate (Renovist), anaphylactic death from, *12* (Abst.)
Methylxanthines, and catecholamines, inhibition by, histamine release in vitro, *44* (Abst.)
Microbial contamination, and pollen, effect of central air filtration and air conditioning on (Spiegelman and Friedman), 193
Microscope, electron, study of immediate hypersensitivity reaction in mast cells, *47* (Abst.)
Milk antibodies, absence, in milk intolerance in adults, *13* (Abst.)
cow's, sensitivity, gluten intolerance following, two cases with coproantibodies to milk and wheat proteins, *36* (Abst.)
and wheat proteins, two cases with coproantibodies to, gluten intolerance following cow's milk sensitivity, *35* (Abst.)
Mite(s), common floor, allergenic identity between house dust and, as causative antigen in bronchial asthma (Miyamoto et al.), 14
and house dust (Perlman), 304 (Correspondence)
allergy in bronchial asthma, *43* (Abst.)
Mold antigens, common, cross-antigenicity, *15* (Abst.)
spore allergy in childhood respiratory disease, significance, *34* (Abst.)
Mononucleosis serum, infectious, specific heterophile antibody from, further characterization, *31* (Abst.)
Mononuclear cells, binding and shering by, in man, red cells coated with immunoglobulin G, *23* (Abst.)
Mortality, observations on recent increase in, from asthma, *10* (Abst.)
Mucosal, and cutaneous neoplasms, immunotherapy, tumors of skin, *27* (Abst.)
rectal, epithelial cells, immunoglobulin A localization in, *4* (Abst.)
Multiple myeloma, role of gamma globulin for immunoprophylaxis in, *21* (Abst.)
Mycobacterium tuberculosis, antibody response following injection with, *46* (Abst.)
Myeloma, multiple, role of gamma globulin for immunoprophylaxis in, *21* (Abst.)
protein, atypical human, specific inhibition of Prausnitz-Küstner reaction by, *5* (Abst.)

N

$NaHCO_3$ infusion in patients with respiratory acidosis, renal excretion of sodium and bicarbonate following, *3* (Abst.)
Nasal smear eosinophiles, antihistamines, effect, in patients with allergic rhinitis, *16* (Abst.)
Neomycin in creams and ointments, differences in sensitizing capacity, *43* (Abst.)
Neoplasms, cutaneous and mucosal, immunotherapy, tumors of skin, *27* (Abst.)
Nephropathy with methicillin therapy, *8* (Abst.)
Neural hearing loss, familial, and atopic dermatitis, *27* (Abst.)

O

Obituaries, 61, 111, 176, 247, 308, 367
Obstruction, airway, before and after isuprenaline, histamine, and prednisolone in patients with chronic obstructive bronchitis, *38* (Abst.)
Obstructive bronchitis, chronic, airway obstruction before and after isuprenaline, histamine, and prednisolone in patients with, *38* (Abst.)
Ointments, and creams, differences in sensitizing capacity of neomycin in, *43* (Abst.)
One-way stimulation test, lymphocyte studies in congenital thymic dysplasia, *30* (Abst.)
Oral contraceptives, sunlight sensitivity from, *3* (Abst.)
Oxygen administration in respiratory failure, studies, *37* (Abst.)

P

Pancreatitis, glucocorticoid-induced, in children, *29* (Abst.)
Paraben allergy, *19* (Abst.)
sensitivity, *19* (Abst.)
Passive transfers, repeated, of allergic encephalomyelitis, altered distribution of lesions after, *30* (Abst.)

Pathogenesis, hypothesis concerning, in studies on "intrinsic" allergic respiratory disease (Schwartz et al.), 169
Pediatric allergy, skin window as diagnostic tool in, *35* (Abst.)
Penicillin allergy (Rosenblum), 309
or its derivatives with solubilized erythrocyte stroma receptors, elicitation of skin test reactions by complexes (Mathews and Pan), 74
"double reaction" to, *27* (Abst.)
systemic allergic reactions due to inhalation, *13* (Abst.)
Perennial bronchial asthma, value of inhalation tests in (Popa et al.), 130
Pernicious anemia, immunologic heterogeneity of autoantibodies, in patients with, *22* (Abst.)
Photosensitivity studies with demethylchlortetracycline and Doxycycline, *12* (Abst.)
Pigeon breeders' disease, *43* (Abst.)
Placebos, comparisons with whole pollen extracts and, immunotherapy of hay fever with ragweed antigen E (Norman et al.), 93
Plasma corticosterone levels, effects of diurnal variation in, on adrenocortical response to stress, *20* (Abst.)
Platinum salts, respiratory allergy caused by (Freedman and Krupey), 233 (Brief communications)
Pneumonia, recurrent, and bronchial asthma, in children, clinical evaluation of 14 children, *26* (Abst.)
Pollen and microbial contamination, effect of central air filtration and air conditioning on (Spiegelman and Friedman), 193
extract, whole, comparisons with placebos and, immunotherapy of hay fever with ragweed antigen E (Norman et al.), 93
Prausnitz-Küstner reaction, specific inhibition, by atypical human myeloma protein, *5* (Abst.)
Prednisolone, isuprenaline, and histamine, airway obstruction before and after, in patients with chronic obstructive bronchitis, *38* (Abst.)
Protein(s) antigen, purified, tolerance in-vitro to, and induction of antibody formation, *7* (Abst.)
milk and wheat, two cases with coproantibodies to, gluten intolerance following cow's milk sensitivity, *36* (Abst.)
myeloma, atypical human, specific inhibition of Prausnitz-Küstner reaction by, *5* (Abst.)
purified basic, preferential development by mice of delayed hypersensitivity to (Crowle et al.), 140
Psychosis, ephedrine, *32* (Abst.)
Pulmonary circulation in bronchial asthma, effects of acetylcholine and isoprenalin on, *6* (Abst.)
emboli masquerading as asthma, *35* (Abst.)
function in bagasse worker's lung disease, *37* (Abst.)

R

Rabbits, antibody response in, to antigenic stimulation during amantadine treatment, *46* (Abst.)
Ragweed, antigen, and antibody, skin-sensitizing, lability of dilutions, on freezing (Feinberg et al.), 157
E, immunotherapy with, comparisons with whole pollen extract and placebos (Norman et al.), 93
Rate, disappearance, of skin-sensitizing antibody activity after intradermal administration (Cass and Andersen), 29
Reaction, double, to penicillin, *27* (Abst.)
immediate, hypersensitivity, in mast cells, electron microscopic study, *47* (Abst.)
Reactions, local, following attenuated measles virus immunization in children who previously received a combination of inactivated and attenuated vaccines, altered reactivity to measles virus, *48* (Abst.)
Reactivity, altered, to measles virus, local reactions following attenuated measles virus immunization in children who previously received a combination of inactivated and attenuated vaccines, *48* (Abst.)
antinuclear, and rheumatoid factor, association with impaired delayed hypersensitivity in aging population, *14* (Abst.)
Reagin (probably), IgE (IgND) specific antibody, detection, to castor-bean allergen by red-cell linked antigen-antiglobulin reaction, *45* (Abst.)
Reaginic antibodies, human, and immunoglobulin E (Ishizaka and Ishizaka), 330
sera, lability of dilutions, on freezing (Feinberg et al.), 157
Receptors, solubilized erythrocyte stroma, penicillin or its derivatives with, elicitation of skin test reactions by complexes (Mathews and Pan), 74
Rectal mucosal epithelial cells, immunoglobulin A localization in, *4* (Abst.)
Red cell destruction and immunologic reactions, mechanisms of, Coombs test positively induced by drugs, *21* (Abst.)
coated with immunoglobulin G, finding and shering by mononuclear cells in man, *23* (Abst.)
Renal excretion of sodium and bicarbonate following $NaHCO_3$ infusion in patients with respiratory acidosis, *3* (Abst.)

Renal—Cont'd
transplantation, human, Shwartzman reaction after, *22* (Abst.)
Renovist, sodium diatrizoate, and methylglucamine, anaphylactic death from, *12* (Abst.)
Respiratory acidosis, renal excretion of sodium and bicarbonate following $NaHCO_3$ infusion in patients with, *3* (Abst.)
allergy caused by platinum salts (Freedman and Krupey), 233 (Brief communications)
disease, allergic "intrinsic," studies on, with hypothesis concerning its pathogenesis (Schwartz et al.), 169
significance of mold spore allergy in, *34* (Abst.)
failure in childhood status asthmaticus, management, experience with 30 episodes and evolution of technique (Wood et al.), 261
oxygen administration in, studies, *37* (Abst.)
Response, bronchial, to exercise, following beta-adrenergic blockade (Zaid et al.), 177
Rheumatoid factor and antinuclear reactivity, association with impaired delayed hypersensitivity in aging population, *14* (Abst.)
Rh IgG immunoglobulin, passive, suppression of primary Rh immune response with, *4* (Abst.)
immune response, primary, suppression, with passive Rh IgG immunoglobulin, *4* (Abst.)
Rhinitis, allergic, effect of antihistamines of nasal smear eosinophiles in patients with, *16* (Abst.)
Roentgen changes in upper gastrointestinal tract, Schönlein-Henoch syndrome, *28* (Abst.)

S

Salicylates, sodium, effect of insulin on transport and analgesic action, *39* (Abst.)
Saliva and serum of pediatric patients, IgA levels in, evidence for local immunological system, *7* (Abst.)
Salts, platinum, respiratory allergy caused by (Freedman and Krupey), 233 (Brief communications)
Schönlein-Henoch syndrome, roentgen changes in upper gastrointestinal tract, *28* (Abst.)
Scratch tests, false positive, histamine in foods causing (Doeglas and Nater), 164
Sensitivity, cow's milk, gluten intolerance following two cases with coproantibodies to milk and wheat proteins, *36* (Abst.)
paraben, *19* (Abst.)
sunlight, from oral contraceptives, *3* (Abst.)
tuberculin, detection, by leukocyte culture, in children, *29* (Abst.)
Sensitization, active, of guinea pigs by inhalation of aerosols of antigen, *7* (Abst.)
Sensitizing capacity of neomycin in creams and ointments, differences in, *43* (Abst.)
tissue culture components in viral vaccines, detection (Wilson et al.), 319
Serum complement (β_{1c}) in young children with atopic dermatitis (Kaufman et al.), 1
infectious mononucleosis, specific heterophile antibody from, further characterization, *31* (Abst.)
and saliva of pediatric patients, IgA levels in, evidence for local immunological system, *7* (Abst.)
uric acid levels in patients with bronchial asthma (Harter), 88
Sex-linked hereditary thrombocytopenia as variant of Wiskott-Aldrich syndrome, *3* (Abst.)
Shering and binding by mononuclear cells in man, red cells coated with immunoglobulin G, *23* (Abst.)
Shock, consideration in differential diagnosis, anaphylaxis (Booth and Patterson), 364 (Brief communications)
Shwartzman reaction after human renal transplantation, *22* (Abst.)
Simmons, A. Harvey, 247 (Obit.)
Skin test antigens, depression of delayed allergic response to, study of immune mechanisms in leprosy, *24* (Abst.)
effect of intranasal dexamethasone on, *32* (Abst.)
reactions, elicitation, by complexes of penicillin or its derivatives with solubilized erythrocyte stroma receptors (Mathews and Pan), 74
tumors, immunotherapy of cutaneous and mucosal neoplasms, *27* (Abst.)
window as diagnostic tool in pediatric allergy, *35* (Abst.)
Skin-sensitizing antibody and antigen (ragweed), lability of dilutions, on freezing (Feinberg et al.), 157
human antipenicillin, heterogeneity (Shibata et al.), 63
disappearance rate, after intradermal administration (Cass and Andersen), 29
Soaps, photosensitive dermatitis from, *11* (Abst.)
Sodium and bicarbonate, renal excretion, following $NaHCO_3$ infusion in patients with respiratory acidosis, *3* (Abst.)
diatrizoate (Renovist) and methylglucamine, anaphylactic death from, *12* (Abst.)
salicylates, effect of insulin on transport and analgesic action, *39* (Abst.)
Solubilized erythrocyte stroma receptors, penicillin or its derivatives with, elicitation of skin test reactions by complexes (Mathews and Pan), 74

Soterenol, bronchodilator, efficacy, on experimental locked-lung syndrome in dogs (Cho et al.), 36
Spandex dermatitis, *19* (Abst.)
Spleen cells, primary, immune response in cultures, *6* (Abst.)
Spore, mold, allergy, in childhood respiratory disease, significance, *34* (Abst.)
Status asthmaticus, management of respiratory failure in, experience with 30 episodes and evolution of technique (Wood et al.), 261
Steroids, anabolic, and cortisone, in asthmatic subject, body composition during long-term administration, *38* (Abst.)
Stimulation, antigenic, during amantadine treatment, antibody response in rabbits to, *46* (Abst.)
  test, one-way stimulation, lymphocyte studies in congenital thymic dysplasia, *30* (Abst.)
Stroma receptors, solubilized erythrocyte, penicillin or its derivatives with, elicitation of skin test reactions by complexes (Mathews and Pan), 74
Strongyloidiasis, larva currens, linear urticaria due to, *42* (Abst.)
Students, medical, antibody response in, effect of dosage and influenza vaccine content on, *5* (Abst.)
Studies on "intrinsic" allergic respiratory disease, with a hypothesis concerning its pathogenesis (Schwartz et al.), 169
  lymphocyte, in congenital thymic dysplasia, one-way stimulation test, *30* (Abst.)
Study of immune mechanisms in leprosy, depression of delayed allergic response to skin test antigens, *24* (Abst.)
Submandibular adenitis due to iodide administration, *39* (Abst.)
Suppressive drugs, immune, studies on, *36* (Abst.)
Susceptibility, progress in detecting worker hypersusceptible industrial chemicals, *37* (Abst.)
Syndrome(s), antibody deficiency, clinical considerations, *40* (Abst.)
  hypereosinophilic, *44* (Abst.)
  locked-lung, in dogs, efficacy of bronchodilator, soterenol on (Cho et al.), 36
  Schönlein-Henoch, roentgen changes in upper gastrointestinal tract, *28* (Abst.)
  Wiskott-Aldrich, sex-linked hereditary thrombocytopenia as variant, *3* (Abst.)
Systemic lupus erythematosus, *28* (Abst.)
  immunologic factors and clinical activity in, *47* (Abst.)

T

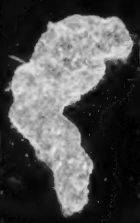
Technique, evolution, and experience with 30 episodes, management of respiratory failure in childhood status asthmaticus (Wood et al.), 261
Tension, arterial-blood gas, in asthma, *42* (Abst.)
Terminology and nomenclature: immunoglobulin E, new class of human immunoglobulin, 305
Test(s), inhalation, value, in perennial bronchial asthma (Popa et al.), 130
  in-vitro, for allergen antibodies, diagnosis of allergy by, *6* (Abst.)
  one-way stimulation, lymphoctye studies in congenital thymic dysplasia, *30* (Abst.)
  skin, effect of intranasal dexamethasone on, *32* (Abst.)
Tetanus toxoid boosters, excessive use, *16* (Abst.)
Therapy, methicillin, nephropathy with, *8* (Abst.)
Thrombocytopenia, sex-linked hereditary, as variant of Wiskott-Aldrich syndrome, *3* (Abst.)
Thymic dysplasia, congenital, lymphocyte studies in, one-way stimulation test, *30* (Abst.)
Thymus, human fetal, ultrastructure, *14* (Abst.)
Tissue culture components, sensitizing, in viral vaccines, detection (Wilson et al.), 319
  injury, role of immune complexes and complement in (Cochrane), 113
  local, response in varicella, effect of bee envenomation on (Hess), 300 (Brief communications)
Toxoid boosters, tetanus, excessive use, *16* (Abst.)
Transfers, repeated passive, of allergic encephalomyelitis, altered distribution of lesions after, *30* (Abst.)
Transplantation, human renal, Shwartzman reaction after, *22* (Abst.)
Transport and analgesic action of sodium salicylates, effect of insulin on, *39* (Abst.)
Treatment, amantadine, antibody response in rabbits to antigenic stimulation during, *46* (Abst.)
Trial, clinical, disodium cromoglycate in treatment of children with asthma, *34* (Abst.)
Tumors of skin, immunotherapy of cutaneous and mucosal neoplasms, *27* (Abst.)
Tuberculin sensitivity, detection, by leukocyte culture, in children, *29* (Abst.)

U

Uric acid levels, serum, in patients with bronchial asthma (Harter), 88
Urticaria, linear, due to larva currens strongyloidiasis, *42* (Abst.)

V

Vaccine(s) content, influenza, and dosage, effect on antibody response in medical students, *5* (Abst.)
influenza, aqueous and depot, antibody-inducing effects, in elderly, *29* (Abst.)
effect, on metacholine (Mecholyl) sensitivity in patients with asthma of known and unknown origin (Anand et al.), 187
upon susceptibility to induction of bronchospasm by exercise (Sly and Schlumbrecht), 182
inactivated and attenuated, local reactions following attenuated measles virus immunization in children who previously received a combination, altered reactivity to measles virus, *48* (Abst.)
killed measles, delayed dermal hypersensitivity following, *6* (Abst.)
viral, detection of sensitizing tissue culture components in (Wilson et al.), 319
Varicella, effect of bee envenomation on local tissue response in (Hess), 300 (Brief communications)
Viral vaccines, detection of sensitizing tissue culture components in (Wilson et al., 319
Virus, measles, altered reactivity to, local reactions following attenuated measles virus immunization in children who previously received a combination of inactivated and attenuated vaccines, *48* (Abst.)

W


Weber-Christian disease, *24* (Abst.)
Weston, Clifford G., 61 (Obit.)
Wheat, and milk, proteins, two cases with coproantibodies to, gluten intolerance following cow's milk sensitivity, *36* (Abst.)
Wiskott-Aldrich syndrome, sex-linked hereditary thrombocytopenia as variant, *3* (Abst.)
